

Measure length of aisle
Supply length measurement in
feet or metres

Depending on how long you want the
runner to be, it can run the length of the
aisle, or it can go right to the doors.

You should probably leave space at the top of
the altar for the 2 chairs for the bride and groom.

Decide where you want **text** to appear
At the bottom of the runner as you begin to walk
up the aisle OR in the middle of the runner where
people on the gallery can see it.

Measure width of aisle
All runners come **1 metre wide** as standard

Aisle Guidelines
